Long Reach Car Openers

Switch Stick

#1

Scan for more info!

Through Car

The **Switch Stick** is a 5-foot (150cm) long **bendable** tool with a **unique hook** end designed to open cars from the inside. This tool slips into a vehicle between the window and door frame. Once inside, the Switch Stick acts as a third hand allowing you to flip switches, lift buttons and hook handles. The hook features a protective coating and rubber cap, so that the **tool will not damage the interior**. The Switch Stick is ideal for vehicles with side impact airbags where customers may be hesitant to have tools enter the door cavity. It is also great for vehicles with flush finger-tip lock switches such as Lexus, Volvo and others.

Switch Stick
No. CO-80

Thru Car Clutch™ and Super Thru Car Clutch™

Through Car

The **Thru Car Clutch™** and **Super Thru Car Clutch™** are two longer versions of HPC's patented Clutch™ Tools. When the two-part handles of the tool are separated, the hook at the end of the tool is pulled inward causing the tool to grip or bind. What sets these two tools apart is that they are **designed for "in-the-car" methods**. The Thru Car Clutch™ car opening tool is a full 5 feet (150cm) in length, making it **perfect for hooking an inside door handle**, manipulating lock buttons and switches or to retrieve keys! Both of these tools have a **flexible shaft and a retractable hook with a rubberized tip** for improved grip. The Super Thru Car Clutch™ Tool is 7 feet (213cm) long for larger, wider vehicles. HPC's Thru Car Clutch™ tools give you that extra hand inside the car.

Thru Car Clutch™

Fishing Pole

No. CO-83C

No. CO-83H

No. CO-83L

Through Car

The **Fishing Pole** is the **most flexible tool ever**. Shift and Shape! Twist and Turn! Flip and Flex! Grip and Grab! At 7 feet (213cm) long, the Fishing Pole easily reaches across almost any car. Its **bendable body** can be configured to any shape. When the handles of this tool are separated, the working end **curves and flexes up to 90 degrees** and can twist in any direction. The Fishing Pole comes with 3 screw on tips including a bendable posi-form wire loop, a super-pull catch and a large sure-grip hook, making it extremely versatile.

Collapsible Opener

SPACE
SAVER

The **Collapsible Opener** is an adjustable tool that can be configured to multiple lengths for various applications. When the 3 segments are assembled, the tool totals 62" (157cm) in length and can reach across the car to unlock the opposite side door. Easy to carry and easy to use, the Collapsible Opener is a valuable addition to your auto entry arsenal.

Collapsible Opener

5-Foot Super Snare

#1

HPC's **5-Foot Super Snare** allows you to enter a vehicle and **pull up buttons, grab keys, pull open levers** and much more! This 5-foot long (150cm) tool is a metal tube with an internal wire that forms a loop on the end. To open the loop, slide the two-part handles together. To close the loop, slide the handles apart. The 5-Foot Super Snare is **easily bendable** and has a rubber tip to help protect the interior of the vehicle. Replacement wire available (No. CO-78W).

Gold Finger

NEW

#1

Gold Finger

The HPC **Gold Finger** is a 5' long (150cm) bendable car opening tool with two special working ends. The hook end is designed to mimic your finger action, pulling levers and flipping rockers. The opposing end is perfect for grabbing switches that must be pushed. The bright yellow ends make them easy to see in dark interiors and the super strong steel body will outlast similar tools.

Gold Finger
No. CO-90

Since 1956, HPC has developed
a worldwide reputation
for designing a wide
range of innovative
car opening tools to make
your job easier!

Through Car

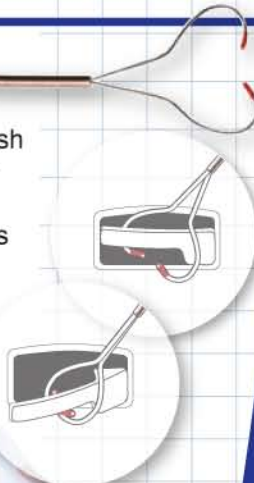

Twin Hooks

The HPC **Twin Hooks** has a **double-hook end** that opens and closes with a simple push and pull of the tool handle. Reaching across vehicles and grabbing door handles has never been easier! The double hook ends overlap each other as they close, giving **twice the strength**, making it a very solid hold. The Twin Hooks securely grabs onto door handles as far as 7 feet (213cm) away.

Twin Hooks

Jim Style Car Openers

Original Slim Jim™

HPC's **Original Slim Jim™**, introduced in 1967, has been **the auto entry tool by which all others have been judged!** While automobiles continue to change every year, the Original Slim Jim™ is still the best way to open large numbers of vehicles. This makes it an essential tool for all auto entry specialists.

Original Slim Jim™ No. CO-10

Bell Crank

Lazy Pawl

Vertical Rod

Horizontal Rod

Scan for more info!

Pocket Jim™

The **Pocket Jim™** with its compact modular design fits in your pocket or glove compartment. The **segmented sections give you the ability to create just the right tool for the job.** Includes three specialized tips for grabbing, pulling and pushing, as well as a through-the-handle tip. The Pocket Jim™ can grasp vertical linkages and because of its thin body, **can be rotated a full 360 degrees inside the door** to locate other offset vertical linkages.

Super Jim™

The **Super Jim™** is a **wider version of the Original Slim Jim™**. This configuration has been designed to accommodate additional automobile models, as well as expedite the entry time on many vehicles. The wider, quicker Super Jim™ is the natural evolution of a classic. Choose the Super Jim™ for stiffer flex, strength and speed!

Super Jim™ No. CO-11

Bell Crank

Lazy Pawl

Vertical Rod

Horizontal Rod

Big Jim™

The **Big Jim™** measures a full 28.5" (72cm) long. **Its extended length will open additional vehicles that have linkages and bell cranks deeper in the door.** While this specially designed tool will open almost every vehicle that the Original Slim Jim™ does, you will appreciate the additional models you can open with the longer length of the Big Jim™ car opener.

Under & Over Car Openers

Caddy Killer™

The **Caddy Killer™** was one of the very first Under & Over Tools. It is a hybrid approach of In-the-Door and Through-Car opening. Inserted into the door cavity, **these tools go under the window and over the door panel on the inside of the car** to pull handles and slide lock buttons to open the door.

Caddy Killer™ No. CO-60

Under & Over

Stretch Killer™

The **Stretch Killer™** has the **most universal dimensions** of all of the Under & Over car opening tools. The height of the arc is greater than the Caddy Killer™, but the working end hangs lower, allowing you to reach locks that sit deeper in the door panel.

Stretch Killer™ No. CO-61

Under & Over

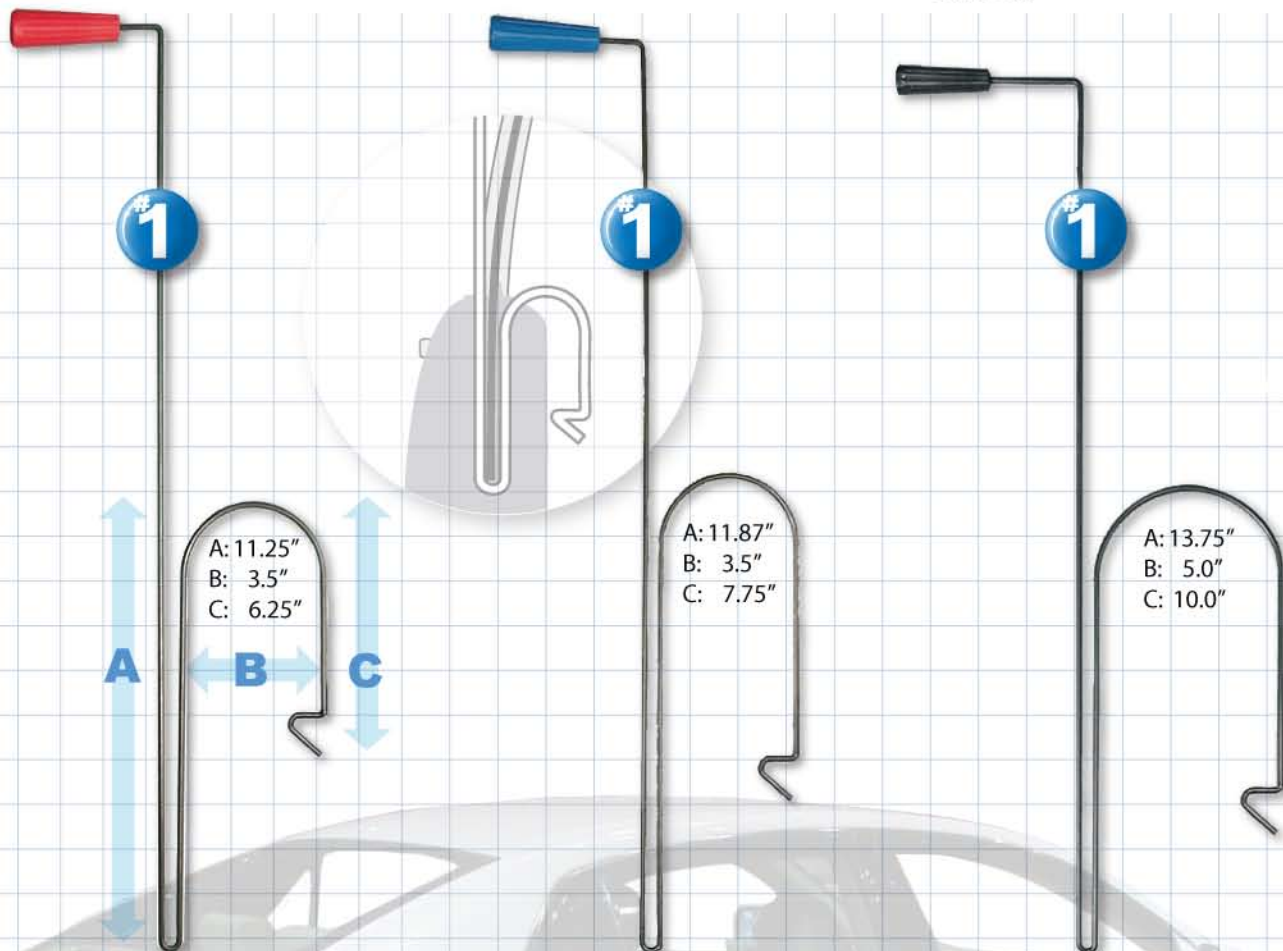

Super Killer™

The **Super Killer™** with its **extra length** and great strength, can be used to open a wide variety of vehicles. This tool has the tallest and **widest arc** of all of the Under & Over tools, allowing it to get under the deepest window and around the widest door panels. This tool works best on vehicles with thicker doors.

Super Killer™ No. CO-70

Under & Over

Horizontal & Vertical Rod Openers

Horizontal Clutch™

Vertical Clutch™

HPC's patented **Clutch Car Openers** are unlike any others on the market. When the handles of the tools are separated, the hook at the end is pulled inward causing the hook to grip or bind the linkage rod. These innovative car entry tools simplify the "in-the-door" method of vehicle entry. Two different styles are available for horizontal linkages and vertical linkages.

Stretch Double "L"

Short Double "L"

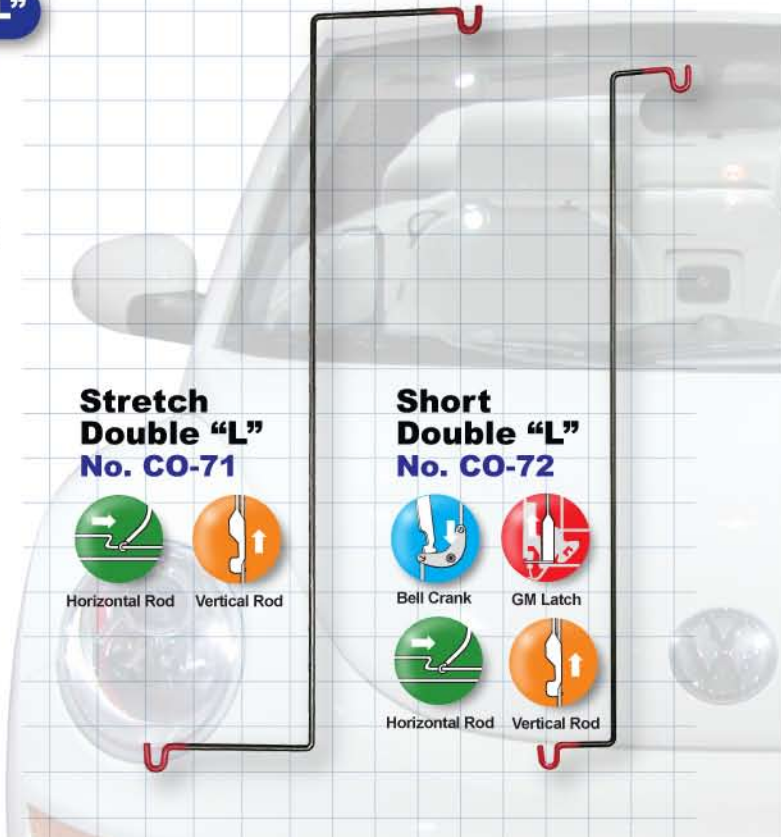

HPC's **Stretch Double "L"** and **Short Double "L"** tools are **highly versatile car openers**. With an upward hook on one leg and an outward hook on the opposite leg, they can easily grab and bind vertical linkages from above or below. The hooks are laminated with a **slip resistant coating** and are able to **reach around many shields**.

Stretch Double "L" No. CO-71

Short Double "L" No. CO-72

Button Tools

Fish Hook

The **Fish Hook** tool is for vehicle entry when the lock button is visible. Used with an HPC Wedge, the tool enters the auto interior, engages the button and **with a simple twist, raises the button**. This unique design features a long reach **memory-flex** rod for bending to the required shape. Replacement hook available (No. CO-86H).

Fish Hook No. CO-86

Under Button Through Car

Button Clutch™

Similar to HPC's patented Vertical and Horizontal Clutch™ Tools and Super Snare, the new **Button Clutch™** will grab lock buttons and not let go! Combined with an HPC Auto Wedge, this hybrid tool will make auto opening **quick and effortless!** Slide the tool between the vehicle door and door frame and place loop over the lock button. While holding onto the bottom handle, lift the top handle to close the wire loop onto the button. Then just pull the button up and unlock the door.

Button Clutch™ No. CO-87

Under Button Through Car

Button Clutch™

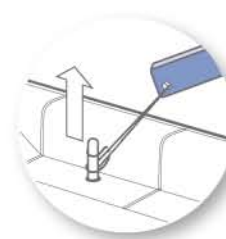

Lasso™

The **Lasso™** tool is for vehicle entry when the lock button is visible. It is made of **high quality "poly-flex" material** with a waxed high-strength lanyard. The tool allows you to knot the string around the lock button providing a non-slip grip to unlock the door. The Lasso™ is **excellent for those luxury car openings** where other tools may damage the interior.

Lasso™ No. CO-73

Lasso

Tight Door Frame Tools

Skinny Twister™

The **Skinny Twister™** is a unique twist in car opening when vehicles put you in a tight spot. The Skinny Twister™ is the **thinnest through-car tool available**. It easily slips through openings where rod tools don't fit. So thin that wedges aren't needed. The **Skinny Twister™ has two different working ends** and can be bent into almost any configuration. It can twist and turn as it squeezes into the vehicle.

Skinny Twister™ No. CO-88

Through Car

Skinny Twister™

Skinny Flipper™

The **Skinny Flipper™** is ideal for vehicles that won't wedge open! One of the thinnest through-car tools available, it **slides between windows and weather-stripping where rod tools just can't fit**. The Skinny Flipper™ is made of super bouncy spring steel and the laminated body allows you to **manipulate the working end from outside of the car**. You'll appreciate the time you save when you use this new solution to tight door seams!

Skinny Flipper™ No. CO-89

Car Opening Kits

With the prevalence of side impact air bags and the increased use of protective shields in the door cavity, opening many locked vehicles needs to be done from the inside of the car. This is the reason that the Through Car Method has become the most popular method of car opening in recent years. HPC offers two kits full of the best tools for performing this opening style, each packed in large vinyl pouches.

Thru Car Killer Kit

The **Thru Car Killer Kit** has a variety of long reach tools and wedges so that you can approach any vehicle with confidence.

No. AW-38 3/8" (9.5mm)

Power Wedge™
No. PW-100

Lever Wedge™
No. LW-100

Air Wedge®

The **Original Air Wedge®** & **Universal Air Wedge®** are **HPC innovations**. Simply slide the wedge between the vehicle door and the weather stripping on the door frame. Squeeze the pump bulb, inflating the Air Wedge®, separating the vehicle door from the frame to **create an opening suitable for the insertion of a car opening tool**. The Universal Air Wedge® features increased width, giving you a **larger gripping area** for inserting the wedge into the top corner of tighter fitting doors. Both are equipped with a release valve and work exceptionally well with the HPC AutoSleeve™ (No. AS-1). **Rugged and reliable, tested and proven, HPC Air Wedges have won their place in the Locksmith's arsenal.**

Ultimate Auto Wedges

The **Ultimate Auto Wedges** are designed for smooth, safe insertion and will not fall into door cavities. The special angled tip allows for easier insertion and the **sure-stop edge** stops you from pushing the wedges in too far. The Ultimate Auto Wedges feature a tapered body that prevents them from popping out and the special "illumination hole" **holds your probe light in place at any angle**. Available in two popular sizes, 3/4" (19mm) and 3/8" (9.5mm) maximum thickness.

Power Wedge™

The **Power Wedge™** is a revolutionary auto entry device designed to aid in opening even the most difficult vehicles! This spring loaded **compound lever** safely spreads a vehicle door away from the body, allowing for the easy entry of a through-the-car opening tool. The Power Wedge™ slides into the opening between the vehicle's door and frame at the top of the door. The **rubber-coated ends protect the vehicle** from scratches and the adjustment knob allows you to control how wide you need the door to open. Simply turn the knob clockwise and watch as the door slowly opens giving you room to use a car opening tool to open the vehicle safely from the inside.

Lever Wedge™

The **Lever Wedge™** is unlike any other tool in the industry! It has been designed and engineered from the ground up. It features a **double pivot point** that allows you to spread a vehicle door from its frame and then with **a simple push, hold it open**. Once in place, the door can be separated farther with the HPC Lever Wedge's secondary lever action. This tool will hold its position with **no need for a second wedge** to hold the door open!

AutoSleeve™

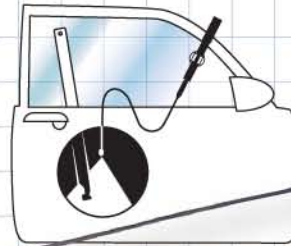

The **AutoSleeve™** helps **prevent damage** to weather stripping and automobile finishes. This hardened **plastic interlocking envelope** is ideal for separating weather stripping from door frames or windows without damage. Once in place, the AutoSleeve™ gives you a **protective tunnel to insert your car opening tool** without worry of scratching or damaging your customer's car. Show your customers that you care enough about their vehicle not to scratch it! The AutoSleeve™ also aids in inserting HPC Air Wedges.

AutoSleeve™
No. AS-1

Flex-A-Light™

The **Flex-A-Light™** is equipped with a durable LED to stand up to heavy use. The **long-lasting LED** is cool to the touch, so that you don't have to worry about a hot bulb breaking when it comes in contact with a cold window. **The Flex-A-Light™ is more flexible than other bending lights, yet rigid enough to keep straight.** Just plug in the light extension and the light is on. The tool includes a suction cup to easily secure the light to the window, or plug in the 36" (91cm) extension and you can keep the power handle in your pocket. Requires 3 AA batteries.

Flex-A-Light™
No. FAL-15X

Interactive Car Opening Authority®

The **Interactive Car Opening Authority®** contains the opening techniques for the **latest 17 years of vehicles**, including all of the current models (more than 1,000 in all). The single-screen interface makes it quick to find the **opening method, airbag locations and transponder information** with only a few clicks of your mouse. It **includes full-action videos** showing how to perform each opening method. There is also **additional in-depth information for over 100 vehicles**. Detailed photographs show specific opening techniques and lock removal procedures. The Interactive Car Opening Authority® is **the most complete and comprehensive reference manual available!**

Interactive Car Opening Authority® No. COA-CD

The Interactive Car Opening Authority® is also available as part of CodeSource®. See the software section for details.

Loaded with photos, videos, illustrations and car opening and servicing information!

Also available in print.
