

Why do you need an HPC KeKab®?

Because Security is important to you.
Because Organization is important to you.
Because Convenience is important to you.

HPC has been the market leader in **Security Storage** for over 50 years. With features not available anywhere else and capacities of 8 to 730 keys, you'll find a cabinet perfect for your security needs.

HPC KeKabs feature heavy-gauge steel construction with a unique powder coat textured paint process that provides an extremely durable and attractive finish that shields against scratches, fingerprints and damaging moisture.

KeKabs offer three storage formats. The innovative **Slotted Key Tag** design allows for uniform storage and a quick visual inspection for missing keys.

A convenient **Two-Tag** format provides two key tags on each hook, keeping the original key in the cabinet. This format also includes a 3-ring binder where you can easily record a permanent record of all of your keys, the people that have them, the doors they open and much more!

KeKabs feature a **variety of different locking options**. We can supply you with a KeKab® that opens with one of the keys you already carry. We can "key" it to your front door, your office door or into an existing master key system.

Who has copies of these keys?

KeKab®
