These are security risks!

Do you know where all of your keys are? Do you know who has them? Did you lend a key to someone? Did you get it back?

Do you know what each key opens? Do you have a spare key if you need it? Do you know where it is?

How many times have you had to call a locksmith to get a new key?

KeKab® Security Storage

Security is about key control.

■ **The KeKab® Single-Tag System** utilizes Yellow "OUT" Tags to record when a key is removed, who has the key and when it is due back.

■ **The KeKab® Two-Tag Series** features a white tag for the "loaner" key and a red tag for a "permanent" key. This insures that you will always have an original key for emergency use and for duplication!

■ The HPC Two-Tag Series also includes a three-ring binder where you can keep a **permanent record of all of your keys**, the people that have them, the doors they open and much more, giving you complete key control!
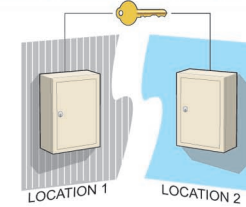

Ask your locksmith about **KeyTrail™**, the complete Key Control Software for your business!
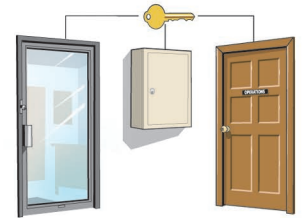

Security that works the way you work.

One key opens two KeKabs at two different locations.

One key opens front door, interior door and KeKab®.

LOCATION 1   LOCATION 2

■ HPC KeKabs feature a variety of different locking options. **We can supply you with a KeKab® that opens with one of the keys you already carry.** We can "key" it to your front door, your office door or into an existing master key system.

Mortise Cylinder   *Dial Combination*

4-Wheel Combination   *Digital Combination*

■ Locking options are plentiful, including standard and tubular. **And if you don't want to carry keys, we offer combination and electronic digital locks with features like key over-ride, auto-lock-out, instant programming and more!**

Security Survey

1. How many doors/locks in your facility?

   _____
